EDUCATION

The International School in Genoa

Genova, Italy

International Baccalaureate Program

Sept. 2023 – May 2025

- Physics, Mathematics AA and Computer Science at HL; Economics, Spanish and English A at SL.

Harvard University

Cambridge, MA

Bachelor of Science: Mechanical Engineering

Sept. 2025 – May 2029

- **Relevant Coursework:** Computer-Aided Machine Design, Electromagnetism, Mechanical Systems, Multivariable Calculus, Linear Algebra & Differential Equations, Computer Science and AI

PROJECTS AND EXPERIENCE

Financial Modeling Analyst

June 2026

City Investment Training

Online

- * Engineered a fully integrated three-statement financial model (IS, BS, CFS) with dynamic debt schedules and circular-reference handling across a 5-year forecast horizon
- * Constructed end-to-end LBO models from first principles, including a comprehensive valuation analysis of the \$3.3B Burger King acquisition.
- * Built a browser-based LBO calculator in JavaScript that outputs IRR and MOIC in real time from user inputs.
- * Performed DCF valuations using terminal value methodologies and a full M&A accretion/dilution analysis.

Vehicle Dynamics and AI Engineer

May 2026 – July 2026

Dallara Racing Group

Parma, Italy

- * Built 3D plotting software to visualize 5D aerodynamic data, cutting review time by 15% across 10k test datasets.
- * Trained a NN on kriging-interpolated data to predict aerodynamic performance, achieving <1% prediction error.
- * Developed a Python cost-optimization tool that replicated wind tunnel data across vehicle symmetry angles, eliminating redundant tests and halving R&D costs.

Mechanical Engineering Team Lead

Sep. 2025 – Present

Harvard Undergraduate Automotive Society - FSAE

Cambridge, MA

- * Managed a \$20K manufacturing procurement budget, negotiated supplier pricing, and secured corporate sponsorships to expand project funding.
- * Led a 10+ member team, managing project execution, resource allocation, and suspension geometry optimization.
- * Collaborated with a senior thesis student to develop the vehicle's rocker system, evaluating design trade-offs to optimize performance and manufacturability.

Marine Propulsion and Engine Systems Intern

August 2024 – Sep 2024

Officina Diesel

Genova, Italy

- * Supported procurement, budgeting, and supplier negotiations for €300K in annual purchasing across 20 vendors.
- * Performed data-driven analysis using advanced diagnostic tools (Delphi DS) to generate operational insights.
- * Supported the overhaul of a Sulzer ZA40S engine, evaluating operational risks to de-risk a €1.5M asset

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

SHAPE Engineering Summer Program | Columbia University, NY

June 2024 – July 2024

- * Led a 5-person team redesigning the Titan submersible, researching material properties and structural modeling.
- * Evaluated the Titan company's economic model, assessing cost efficiencies, operational risks, and profitability-driven design decisions.
- * Optimized robotic arm mechanics in AutoCAD, improving motion efficiency and precision by $\approx 12\%$.

Leadership and Public Speaking Course | EKIS Company

March 2024 – May 2024

- * Completed 20+ hours of public speaking training, delivering 15+ presentations to diverse audiences.
- * Delivered presentations to 300+ people, emphasizing structured reasoning and clarity.
- * Directed interactive workshops of 20+ participants, managing session design and audience engagement.

TECHNICAL SKILLS

Languages: Italian (Native speaker), English (fluent - IB Diploma, TOEFL 113/120), Spanish (fluent - B2 level)

Software: Microsoft Office Suite, SolidWorks/AutoCAD, Excel Proficiency Certificate

Programming: Python, Java, HTML, XML, JavaScript
